

UPGRADE X-CRUISER 385 AND 600

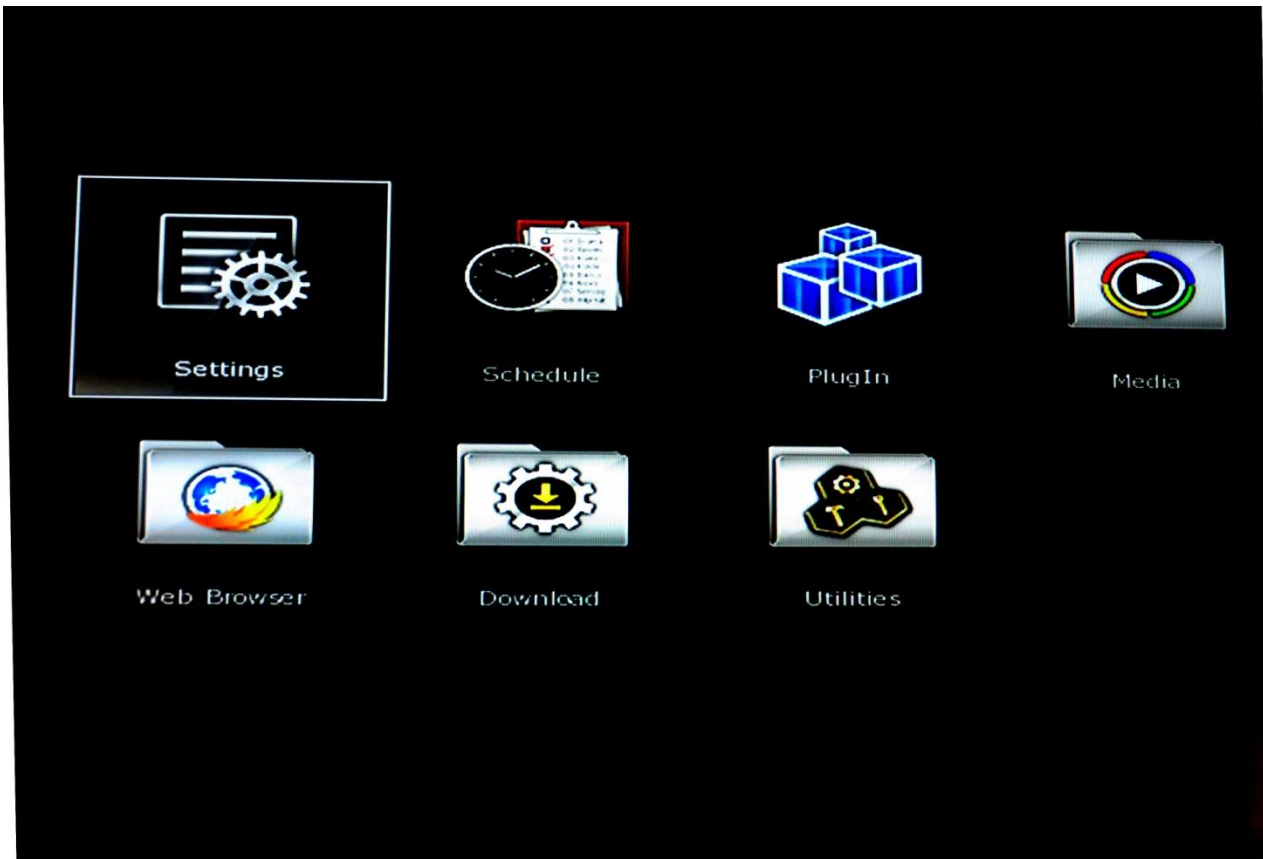

Your X Cruiser 385 and 600 has many features that you will no doubt be very pleased with, including the ability to upgrade the firmware via the internet.

In order to do this you can follow these easy steps:

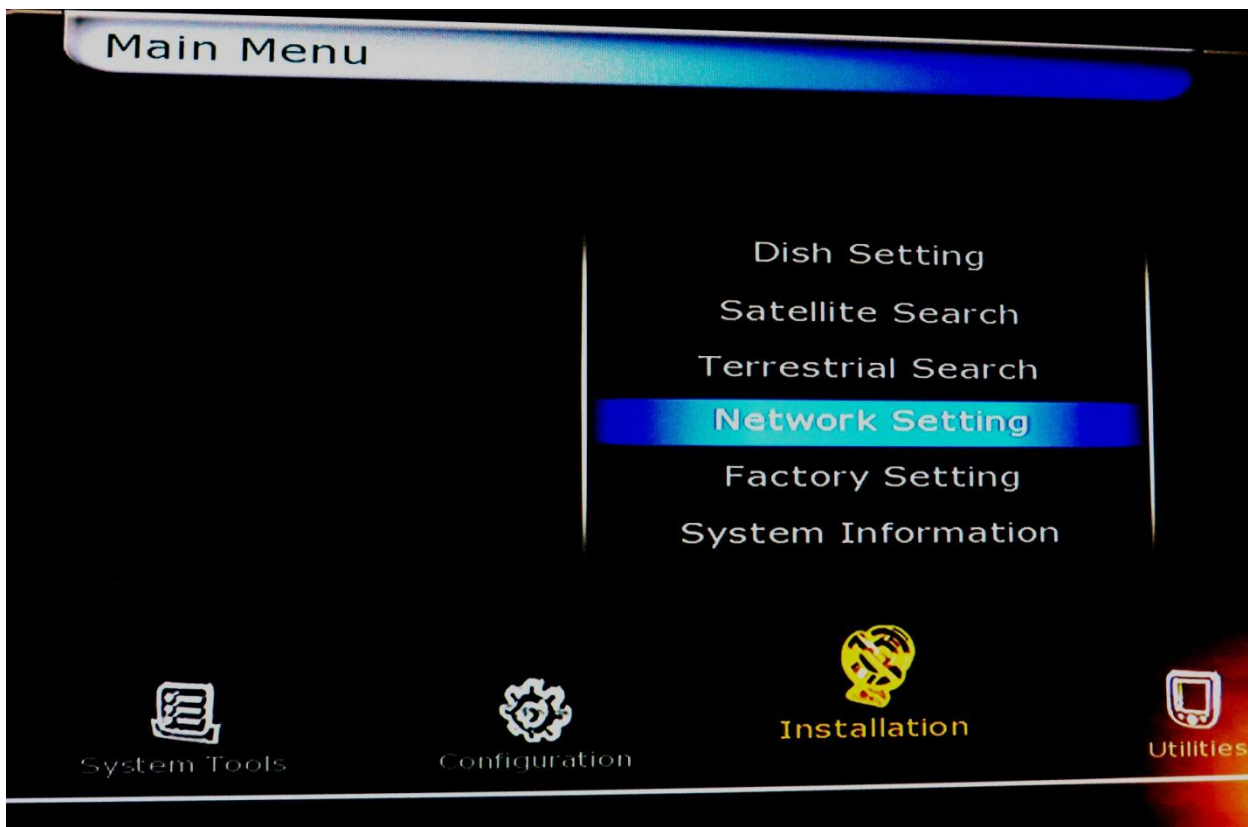

- 1) Please insert a memory stick into the USB slot of your unit

- 2) Take you remote push the **MENU** button. Arrow across to **settings** and push **OK**

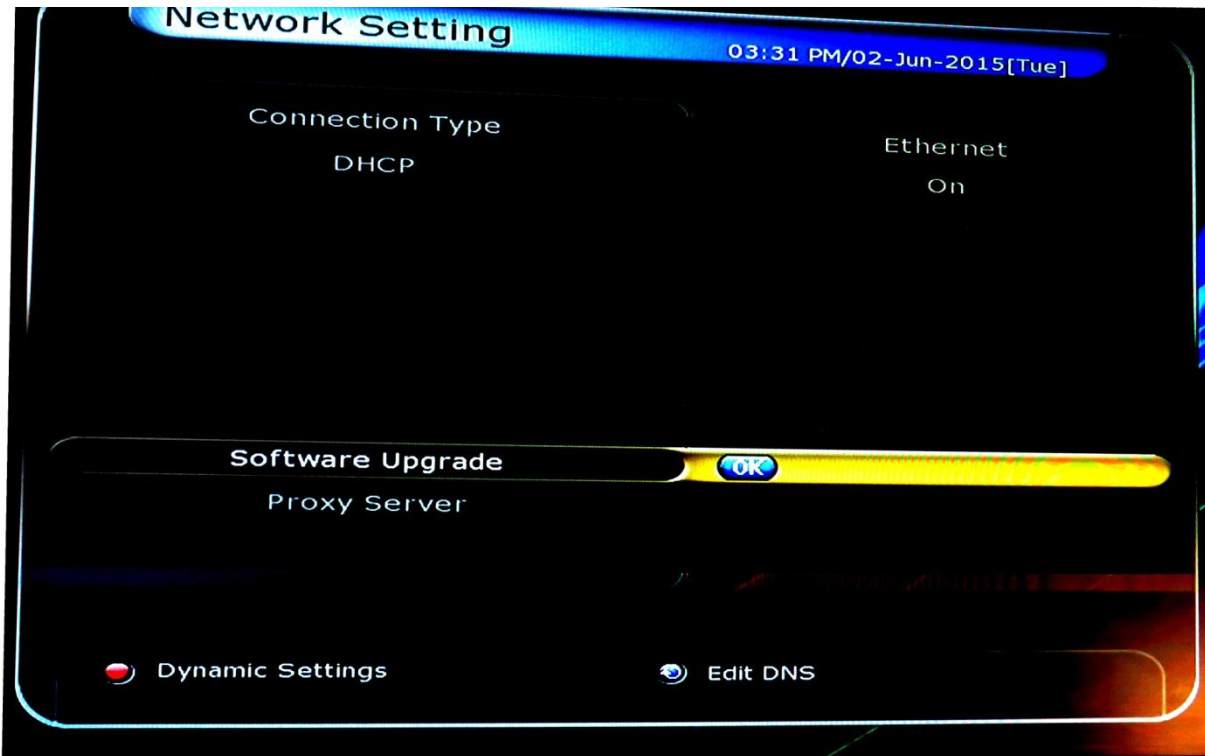

3) Arrow across to **Installation** and push OK on **Network Setting**.

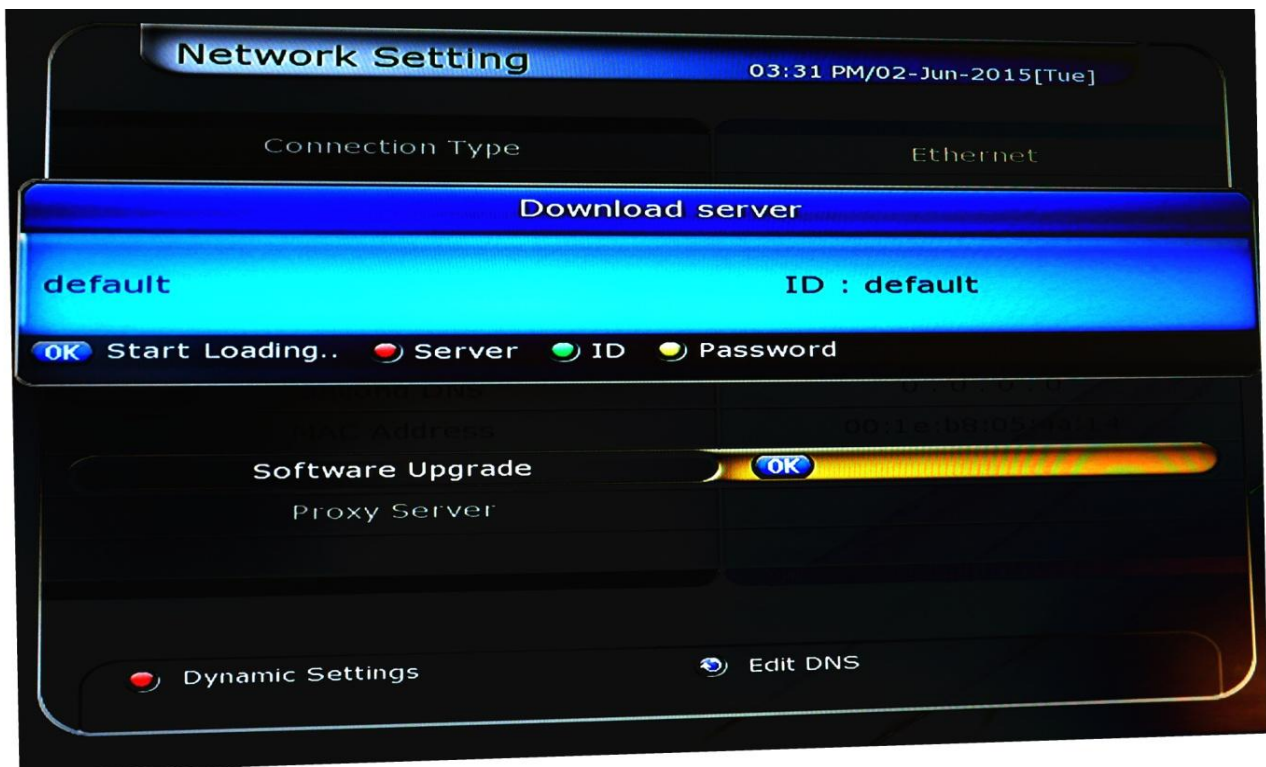

JX Antenna and Networks
2 Cheryl Place; Hillcrest; Auckland
Ph (09) 443 3749 (021) 439 431

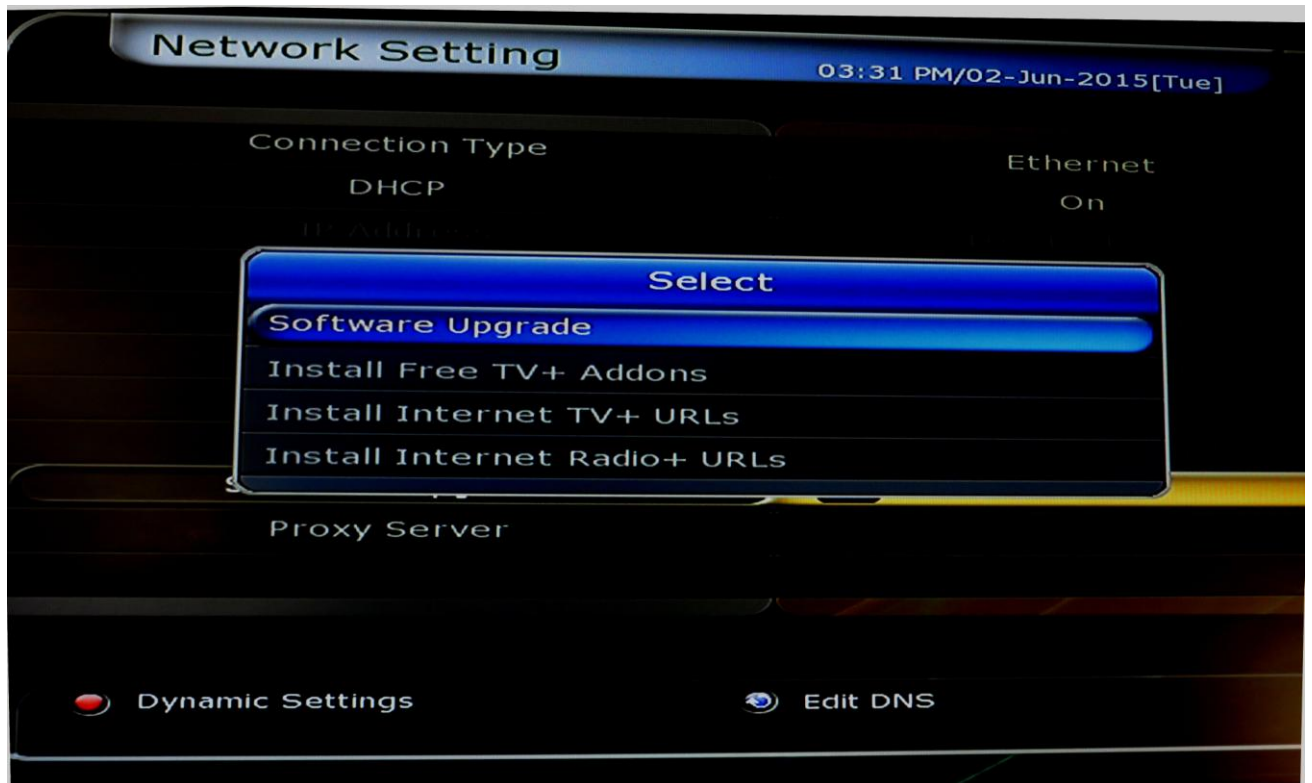

- 4) Scroll down to **Software Upgrade** and push **OK**

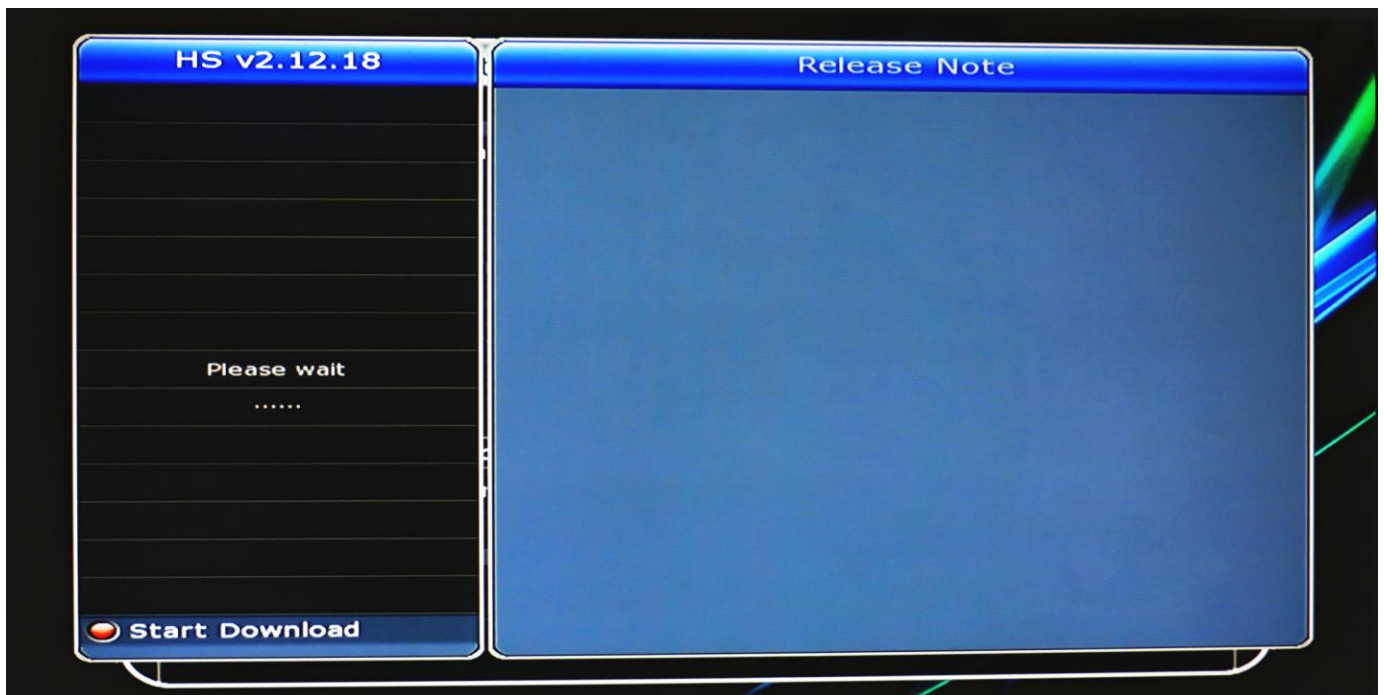

- 5) Ensure that the server name is set to **default**. If it's not, please push the red button on your remote, and enter the word "**default**" using your remote.

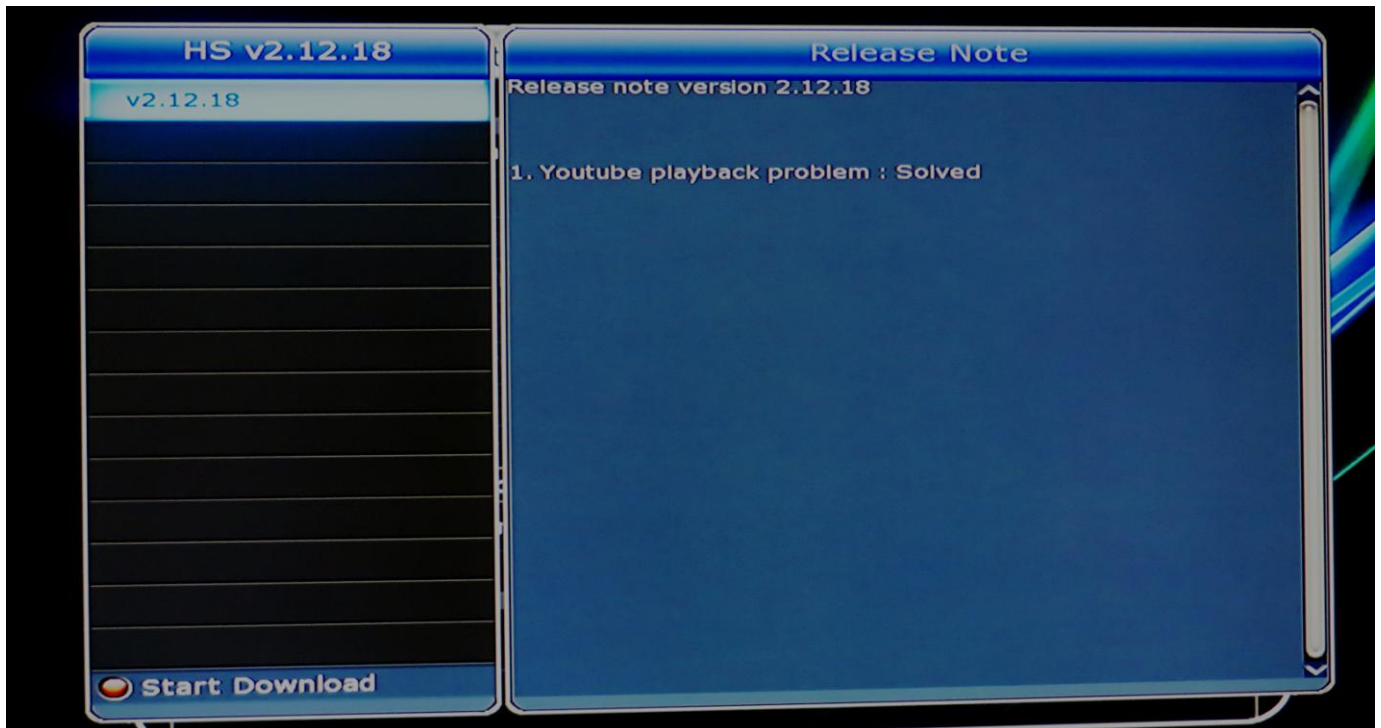

6) Once your server ID is set to default push OK on your remote.

7) Push **OK** on **Software Upgrade**

- 8) Your unit will connect with the upgrade server to check for latest software version(s). Please note your current version.

- 9) Push the red button to start downloading.
